## SUMMARY

Software Engineer with a robust foundation in full-stack development, specializing in JavaScript, React, and Node.js. With three years of experience, adept at creating CRM and ERP applications and integrating digital solutions with platforms like AWS, ServiceTitan and Zapier. I'm passionate about leveraging AI microservices to enhance client operations alongside beautiful UIs, and committed to driving technical vision in dynamic startup environments or levelling up in more established corporations.

## PROFESSIONAL EXPERIENCE

**Software Engineer** 2022 – 2024  
The Graphite Lab

- **Engineered and maintained** scalable, full-stack software solutions, encompassing design, development, testing, documentation, and support.
- **Delivered tailored digital solutions** for residential and commercial trades businesses, including **AI-driven microservices** and a subscription-based web application.
- **Spearheaded the development** of "The Toolbox," a CRM and ERP web application, utilizing **React, Node.js, AWS Amplify, JavaScript, GraphQL**, and integrations with **Zapier, ServiceTitan** and more.
- **Collaborated directly with the CEO** as the sole engineer in a startup setting, leading technical strategy, execution, and delivery of the company's core product.
- **Streamlined client operations** by ensuring seamless integration and functionality of the application, driving significant improvements in efficiency and user experience.
- **Assisted in the development** of various digital solutions for third-parties, such as a drain pump monitoring app, an ad/marketing/sales app, a CRM data conversion tool and more.
- **Leveraged modern tools** such as **Miro, Jira**, and **Slack** to optimize workflows and ensure alignment with business objectives.

## EDUCATION

Bachelor of Science,  
Psychology  
Stony Brook University  
2015 – 2019

Advanced Software Engineering  
Immersive  
Hack Reactor  
2021 – 2022

## SKILLS

Tools:  
JavaScript, React, HTML5  
CSS3, Node.js, Express  
PostgreSQL, MySQL, AWS  
Git, GraphQL, Vue, MUI  
API Development  
Microservices  
UI/UX Design  
Artificial Intelligence

## Current Project: RECO

- **Built a media recommendation app** to learn **TypeScript** and **Vite**, integrating **OpenAI, Google**, and **Spotify** APIs for dynamic, real-time recommendations.
- **Designed a secure system** with **OAuth2 authentication** and a custom **database** while implementing a **web scraper** to aggregate media data.
- **Orchestrated frontend and backend components** into a cohesive solution, enhancing full-stack development skills.
